

## Sustainability Policy Statement

Sustainability may be described as meeting the needs of today while not compromising the needs of the future.

J Breheny Contractors Ltd believes that sustainability of resources, and the environment around them, is of the highest importance.

We seek to enhance the quality of life, by meeting the needs for environmental, social and economic well being, both now and in the future, to the long term benefit of the community and provide a sound legacy for future generations.

In particular it is our policy to:

- Comply with appropriate legislation and regulations.
- Preserve, repair and enhance the natural and man-made environment, through conservation and by tackling pollution.
- Conserve natural resources by securing reductions in waste generation and by actively encouraging all forms of recycling.
- Lessen the impact of climate change and make better use of resources by promoting energy efficiency measures and alternatives to fossil fuels.
- Prevent environmental damage and preserve natural resources.
- Use our voice in the industry, and through involvement in national forums, to lobby for adoption of initiatives in line with our environmental policies.
- Contribute to national and local initiatives that further good development of environmental and sustainability policy.
- Regularly review our procedures to ensure that we continually meet best practice, and strive for continuous improvement, in use and possible re-use of resources.

This policy statement should be read in conjunction with our Environmental Policy Statement and ISO 14001 Accredited Environmental Management System.

This Policy is to be reviewed no later than 31<sup>st</sup> December 2012.
